Funds will be spent to upgrade pre 1950 components within the existing wastewater system, such as gravity sewer mains and manholes. The existing system is deteriorating due to age and much of the system is experiencing significant amounts of inflow and infiltration, along with sand intrusion which is causing further deterioration of the system. Existing components are leading to safety hazards for citizens due to infrastructure collapsing and much of the system being located within roadways.

12. Provide specific details on how funds will be spent. (Select all that apply)

Benefit or Outcome	Provide a specific measure of the benefit or outcome	Describe the method for measuring level of benefit
<input type="checkbox"/> Improve physical health		

<input type="checkbox"/> Improve mental health		
<input type="checkbox"/> Enrich cultural experience		
<input type="checkbox"/> Improve agricultural production/promotion/education		
<input type="checkbox"/> Improve quality of education		
<input type="checkbox"/> Enhance/preserve/improve environmental or fish and wildlife quality		
<input checked="" type="checkbox"/> Protect the general public from harm (environmental, criminal, etc.)	Reconstruction or improvements to existing roadways. Outdated manholes continue to collapse creating a safety hazard to citizens due to the majority of the manholes being located within roadways. Broken pipes will be replaced eliminating sand and water intrusion.	Success would be measured by Geotechnical evaluations and compaction testing on the improved roadways as well as less I/I flows to the existing WWTP. Maintenance will decrease at several lift station sites due to minimizing sand intrusion through broken pipes and leaking manholes.
<input type="checkbox"/> Improve transportation conditions		
<input type="checkbox"/> Increase or improve economic activity		
<input type="checkbox"/> Increase tourism		
<input checked="" type="checkbox"/> Create specific immediate job opportunities	The construction project would provide immediate job opportunities for the entire area.	The project would require utility crews, paving crews, and landscape and irrigation workers to complete the project.
<input type="checkbox"/> Enhance specific individual's economic self sufficiency		
<input type="checkbox"/> Reduce recidivism		
<input type="checkbox"/> Reduce substance abuse		

<input type="checkbox"/> Divert from Criminal/Juvenile justice system		
<input checked="" type="checkbox"/> Improve wastewater management	Upgrades to aging infrastructure, such as deteriorating manholes and sewer mains. Failing components within the wastewater system will cause wastes to leech into the groundwater.	Success would be measured by groundwater analysis to determine fecal coliform in groundwater as well as sand and I/I intrusion.
<input type="checkbox"/> Improve stormwater management		
<input checked="" type="checkbox"/> Improve groundwater quality	Upgrades to failing components within the wastewater system. Manholes that collapse and sewer mains that are deteriorating with cracks and holes would cause wastes to leech into the groundwater.	Success would be measured by groundwater analysis to determine fecal coliform in groundwater.
<input checked="" type="checkbox"/> Improve drinking water quality	Upgrades to failing components within the wastewater system. Manholes that collapse and sewer mains that are deteriorating with cracks and holes would cause wastes to leech into the groundwater. In Florida, groundwater is the source for drinking water.	Success would be measured by groundwater analysis to determine fecal coliform in groundwater.
<input checked="" type="checkbox"/> Improve surface water quality	Upgrades to aging infrastructure, such as deteriorating manholes and sewer mains. Outdated manholes that continue to collapse could potentially cause wastes to enter into surface water during major rain events.	Success would be measured by surface water quality analysis to determine fecal coliform in roadside swales containing surface water.
<input type="checkbox"/> Other (Please describe):
